

Azure Virtual Desktop Enablement

Services Give Employees Secure Access to Core Business Applications with Azure Virtual Desktop

ACCESS YOUR DESKTOP & APPLICATIONS FROM ANYWHERE

In a three-step process, Alif will design and implement a AVD solution that meets each client's business needs and is optimised for their unique operational requirements.

- ✓ **100+ AVD Customer**
- ✓ **24/7 Support Services**
- ✓ **AVD Expert Professionals**
- ✓ **24/7 NOC-SOC Support**

ABOUT OUR SERVICES

Employee productivity in many businesses depends on people having access to their desktops and applications, on giving them a seamless experience and enabling them to get on with their jobs, wherever they are regardless of the device.

With its Azure Virtual Desktop (AVD) service, Alif provides the most comprehensive desktop virtualisation solution yet – enabling fast and easy access to critical applications. Built on Microsoft Azure, AVD provides a Windows 11 experience that's secure, cost-effective and easy to manage. We use Microsoft architecture to enable role-based access to applications and services, managing identities and optimising profiles, ensuring people can securely use the tools they need with no degradation in performance.

Alif Support & Managed Services

Early Life Support

Patch Management

User Profile Optimization
