

OUR COMPANY

Alif is a registered company in UEA and India. Alif has operations across Middle East, India, US, Europe & Africa through direct and indirect means.

Alif has a team of Technologists and Problem Solvers who live agile methods every day. We apply human centered design driven by client's business goals to help inform, explore and confirm user experience decisions, solve big problems and bring ideas to market.

Core competencies for Alif is around Microsoft Cloud Technologies and industry verticals that leverages these technologies. We leverage disruptive technology trends with a reliable line of sight in the horizon and deliver value to our customers through insights like what users will expect, what technology will be available for main stream, how fast networks will move, and where the next disruption will emerge.

What we do?

Strategy

Strategy Offerings

- Cloud readiness and maturity assessment
- Gap analysis and remediation plan
- Initiatives identification and prioritization
- Strategy and roadmap development
- Cost benefit analysis
- Minimum Viable Cloud
- Proof of Concept and Proof of Value
- Cloud kick starter program

Design

Design Offerings

- Design and blueprints for cloud strategy initiatives
- Solution design and architecture development
- Cloud native application design and development
- Rapid prototyping
- Application fitment and profiling for cloud
- Application migration assistance- Rehost, Replatform, Repurchase, Refactor, Retire, Retain

Migration

Migration Offerings

- Physical to Private cloud migration
- Physical/Private to Public cloud migration
- Application Migration Factory
- Infrastructure Automation
- Services Management and operation optimization
- Vendor/Supplier management
- Project Management Office

Operations

Operations Offerings

- Cloud based Backup, Archival and DR
- Backup and recovery support
- DR and Business continuity support
- Capacity issues and performance bottlenecks identification
- Capacity modelling and analysis
- Cloud Managed Services
- DevOps and SysOps services

GRC

GRC offerings:

- Governance controls and operating model design and implementation
- Application and data compliance assessment
- Evaluation of risk profile in a cloud delivery model
- Cloud security technology assessment
- Security controls and assessment
- Remediation implementation for vulnerabilities

Cloud Transformation Service

We walk the journey with you to the cloud and create the IT infrastructure platform for the future that supports your business transformation

Cloud Computing + Storage

- Azure Virtual Machines
- Azure Functions
- Azure Container Instances
- Azure Kubernetes Services
- SQL Server on Azure
- Azure Storage
- Azure Backup
- Azure Data Lake Storage
- Azure Archive Storage

Cloud Migration

- Azure Site Recovery
- Azure Database Migration Service
- Azure Migrate

Cloud Networking

- Azure Content Delivery Network
- Azure DNS
- Azure ExpressRoute
- Azure Virtual Network
- Azure Load Balancer
- Azure Firewall

Azure Cloud Solutions

Cloud Management

- Azure Service Health
- Azure Monitor
- Network Watcher
- Azure Advisor

Cloud Database

- Azure SQL Database
- SQL Data Warehouse
- Azure Cosmos DB
- Azure Database for PostgreSQL
- Azure Database for MySQL
- Azure Database Migration Service
- Azure Redis Cache

Cloud Security

- Azure Active Directory
- Azure Security Center
- Azure DDoS Protection
- Azure Key Vault
- Azure VPN Gateway

Modern Workplace Services M-365

01

Application

- Word
- Excel
- PowerPoint
- OneNote
- Access
- Teams
- Sharepoint,
- Yammer
- Onedrive

02

Identity and access management

- Single Sign-On (SSO)
- ADFS
- Multi-Factor Authentication
- Application Proxy
- Conditional Access
- Microsoft Cloud App Security integration
- Privileged Identity Management (PIM)

03

Threat protection

- Microsoft Advanced Threat Analytics
- Microsoft Defender Advanced Threat Protection
- Microsoft 365 Advanced Threat Protection
- Azure Advanced Threat Protection

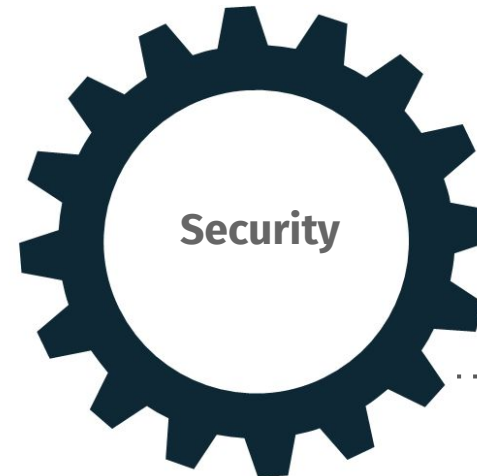

04

Device and app management

- Microsoft Intune
- Information protection
- Microsoft 365 data loss prevention
- Windows Information Protection and BitLocker
- Azure Information Protection
- Cloud App Security

Managed Services

- 24x7 Engineering Support
- Alif becomes an extension of your team, providing expertise, around-the-clock coverage, and proactive services to ensure performance and uptime.
- 24x7x365 Network Operations Center
- Senior engineering specialists
- Dedicated Account Manager
- 50+ Cloud certified engineers

- Identity and Access Management
- Security Assessment
- Web Security
- Threat Analytics

- Azure Resource Monitoring
- System Health monitoring
- Log Analytics
- Performance Monitoring

- Usage Visibility
- Cost Control
- Forecasting
- Resource Utilization
