

Use the template in this PowerPoint deck to customize the datasheet for your brand by adding your logo and content where noted, and optionally replacing the colors and fonts.

(See example below right for how the template colors can be customized)

Yellow highlights in the template indicate the areas where text or elements should be customized for your brand.

- 1 Replace the “Partner Logo” placeholder with your company logo on front and back of the datasheet. Per Microsoft’s Partner Brand Guidelines, ensure your logo is 120% of the size of the Microsoft Security logo.
- 2 Replace all instances of “Partner Name” or “Partner Solution” with your own company/solution name and add any additional partner-specific content where identified. Be sure to remove the yellow highlighting and change the font color to match the surrounding text.
- 3 Replace the template font with your brand font, matching weights. (Note that font type sizes vary and you may need to adjust your size to fit.)
- 4 You may change the solid color block sections, gradient overlays on the graphic banners, and text headlines to your own brand color(s).
- 5 Save your final art. Delete this instruction slide and use the **File** pulldown menu to select Export to save as a **PDF**.

Secure multi-cloud environments with Microsoft and [Partner Name]

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. With [Partner Name] and Microsoft, get help achieving your hybrid and multi-cloud security objectives while identifying current and real threats.

Strengthen your security posture

Easily assess and improve the secure configuration of your critical multi-cloud resources

Protect workloads against advanced threats

Get cloud-native protection with Microsoft's leading threat protection and shared intelligence

Manage access & permissions to apps

Control access to critical resources and protect assets

Build secure apps in the cloud

Empower developers with the only native app security testing solution within the developer flow

30%

savings from unifying cloud security tools with Microsoft Defender for Cloud¹

\$479K

in human capital freed up by redeploying IT time with Microsoft Endpoint Manager²

88%

less time responding to threats with Microsoft Sentinel, Microsoft 365 Defender, and Microsoft Defender for Cloud³

Do more with less

Simplify Vendor Management

Reduce threats with AI and Automation

Improve Operational Efficiency

Secure Multi-Cloud Environments Workshop

Get a customized threat and vulnerability analysis of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system.

What to expect:

During this-workshop, we'll partner with you to strengthen your organization's approach to hybrid cloud security while helping you better understand how to prioritize and mitigate potential attacks.

Discover threats and vulnerabilities in your hybrid environment.

Learn how to prioritize and mitigate potential threats to your servers and services.

Understand what can be done to reduce the attack surface area for hybrid workloads.

Learn about benefits and capabilities of Microsoft Defender for Cloud and Azure Network Security.

Develop defined next steps based on your needs and objectives.
